PERSONAL PROJECTS

ACTION GAME: Game Development

- Created an Action Game using HTML, CSS and JavaScript
- interactive gameplay mechanics, character movement, and enemy interactions.
- optimized game performance for smooth rendering and responsive gameplay.
- implemented dynamic animations and visual effects to enhance the gaming experience.

SPOTIFY Clone App

- developed a responsive Spotify-inspired music streaming app using HTML, CSS, and JavaScript, focusing on creating a user-friendly interface and functional audio playback.
- Designed dynamic song lists and search functionality
- implemented a fully functional audio player with play/pause, previous and next controls, and a progress bar.

MICROGRID SCHEDULING (08/2022 - 06/2023)

- using a microcontroller, relay, transformer, diode, regulator, Grid 1 setup, Grid 2 setup, Bluetooth module, load, Arduino IDE, Bluetooth terminal
- The project aimed to provide an uninterrupted power supply for loyal energy consumers.
- Through the implementation of this, the problem of interruption of power supply due to energy misuse by consumers can be avoided.
